Education

University of Western Ontario — London, Ontario, Canada
Bachelor of Science in Computer Science — *September 2023 - April 2027*

Ivey Business School — London, Ontario, Canada
Honours in Business Administration — *September 2025 - April 2027*

Experience

Opendoor — Toronto, Ontario
AI Operations Engineer | `Claude Code, Codex, Cursor, Next.js, Docker` — *May 2026 – Present*

- Hired as Opendoor's **first-ever intern** and **youngest hire**
- Built **Paintbot**, an AI-driven system that processes **$100K worth of paint orders every week** and fully automated **50% of all paint orders** end-to-end, eliminating manual human review for those orders
- Automated approximately **2,500 rental-scam tickets every month**, converting repetitive case handling into reliable workflows

Mely.ai — London, Ontario
Full Stack Engineer Intern | `Vue, Docker, PostgreSQL, LLMs, Python, C#` — *May 2025 – September 2025*

- Redesigned embeddings data movement across tables, resulting in a **300%** efficiency gain and cutting query latency from **12s to under 3s**
- Developed a **"Create Auto Rule" guardrail system** for extraction, reducing manual interventions by **60%** and raising first-pass accuracy to **95%+**
- Triaged and resolved **50+ production issues** end-to-end across the release cycle, maintaining **99.5%** platform uptime for enterprise clients

Western University — London, Ontario
Research Assistant — *April 2025 - August 2025*

- Ported the **M3Drop** package from R to **Python**, achieving **5x faster** single-cell RNA-seq analysis and enabling integration into modern bioinformatics pipelines
- Created **Jupyter**-based tutorials that reduced researcher onboarding time from **2 weeks to 3 days**, adopted by **15+** lab members
- Leveraged **AI coding agents** (Codex, Claude Code) to accelerate CPU-optimized conversions, reducing processing time on **50,000+ cell** datasets by **70%**
- Co-authored methodology and validation with Professor Tallulah Andrews, contributing to a **peer-reviewed publication**

Blanc AI — London, Ontario
Cofounder | `Next.js, FastAPI, LLMs` — *October 2024 - April 2025*

- Built an **AI agent** to automatically calculate material quantities and generate contractor quotes, cutting time-to-quote from **2 hours to under 5 minutes**
- Scaled to production adoption by general contractors, generating **10,000+** quotes and saving an estimated **3,000+ contractor hours**
- Secured **$12,000** in funding from the Western Accelerator (Morrissette Institute for Entrepreneurship)
- Selected by Ripple Ventures for the **Ripple X Fellowship** (acceptance rate <**5%**), accelerating go-to-market strategy and user acquisition

Projects

GrokHunt | `Grok, Next.js, Flask` — 2025

- Won the **xAI Hackathon** with an end-to-end Grok talent discovery, evaluation, and personalized outreach system
- Featured by **SpaceXAI** on X, garnering nearly **300,000 views**

NASA/NSS Gerard K.O'Neill Space Settlement Contest: Gaia's Hope — October 2022 - May 2023

- Earned **1st place globally**, outperforming **26,725** students across **19** countries and surpassing **4,567** entries
- Received worldwide recognition through NASA/NSS official page and featured in multiple local newspapers

Technical Skills

Languages: Python, JavaScript, Java, C, C#
Technologies: React, Next.js, Django, FastAPI, Vector Databases, Large Language Models, Claude Code, Codex
Databases & Tools: PostgreSQL, MongoDB, AWS, Git, Docker
Interests: Startups, Artificial Intelligence, Storytelling
